PROFESSIONAL SUMMARY

Data Engineer and Software Developer experienced in Python, SQL, PySpark, Databricks Lakehouse, Delta Lake and dbt. Hands-on experience building ETL/ELT pipelines on Azure and AWS, with data quality, analytical modeling and CI/CD, using ADF, ADLS Gen2, Azure DevOps, PostgreSQL on AWS RDS and Amazon S3.

TECHNICAL SKILLS

Languages and transformation: Python, SQL, PySpark, Spark SQL, dbt, ETL/ELT.
Databricks and Lakehouse: Notebooks, Jobs/Workflows, Unity Catalog, Volumes, Delta Lake and Delta tables; Bronze/Silver/Gold Medallion Architecture, star schema, partitioning and idempotency.
Cloud and databases: Azure Data Factory (ADF), ADLS Gen2, Azure Databricks, Azure DevOps; AWS RDS, IAM Identity Center/SSO, Amazon S3; PostgreSQL, SQL Server, MySQL.
Data quality and tools: validation, cleansing, normalization, deduplication; Git/GitHub, CI/CD, Docker Compose, Excel/CSV/XLSX, access through tunnels; Jira, Notion, Slack and ClickUp.
Software development: Java, Spring Boot, .NET/C#, REST APIs, VS Code, IntelliJ and SSMS.

PROFESSIONAL EXPERIENCE

Data Engineer (Contractor) | Ruvixx, Inc. | Remote, USA | 01/2026 - Present

- Work with Databricks, PostgreSQL on AWS RDS, IAM Identity Center/SSO, Amazon S3 and Excel/CSV/XLSX files to query, prepare, validate and import client data.
- Develop and maintain Python and SQL workflows for data extraction, normalization, deduplication, imports and dataset troubleshooting.
- Build data quality checks for nulls, duplicates, formats, field consistency, record counts and operational rules in recurring processes.
- Document runbooks and processes; collaborate with international teams through Slack and ClickUp.

Technical Coordinator (Contractor) | FGH - Sports Fintech Startup | Argentina | 09/2024 - 08/2025

- Coordinated a cross-functional team of 7 developers: planning, task assignment, tracking in Jira, code reviews, delivery and documentation in Notion.
- Designed and supported workflows with ADF, ADLS Gen2 and Azure Databricks for data ingestion and transformation using Python, PySpark and SQL.
- Contributed to the implementation of ETL/ELT pipelines and Medallion Architecture patterns in Azure Databricks, using dbt to develop and organize SQL models for data cleansing, deduplication and transformation to support analytics.
- Supported version control and deployments with Git and Azure DevOps, including CI/CD pipelines for data and application components.
- Contributed to cloud infrastructure, access management, production support, monitoring and pipeline troubleshooting in Azure.

TECHNICAL PORTFOLIO

AgriDax Data Platform. An agricultural analytics platform with Python, PostgreSQL 16, dbt Core and Docker Compose; data quality, incremental processing and transactional publishing.

Databricks Medallion Lakehouse. Bronze/Silver/Gold pipeline with PySpark, Spark SQL, Delta Lake and Unity Catalog; star schema, data quality checks and orchestration with Databricks Jobs.

ADDITIONAL EXPERIENCE

LLM Trainer (Contract) | Turing Enterprises Inc. | Remote, USA | 07/2025 - 12/2025

LLM training and evaluation, tool-calling and bilingual responses (English/Spanish).

Research Scholar | UTN-FRGP - AI Project | Argentina | 04/2025 - Present

Python tools for automated analysis and reporting with Streamlit, Tkinter and Kivy.

Teaching Assistant - Programming I | UTN-FRGP | Argentina | 08/2024 - Present

Provide tutoring on programming fundamentals, problem-solving and best practices.

EDUCATION CERTIFICATIONS AND LANGUAGES

University Technical Degree in Programming | UTN-FRGP | 03/2024 - 2026.

Training: Full Stack Developer (AP / Universidad de La Punta); Java Developer (Universidad Siglo 21); Oracle ONE.

Certifications: OCI Foundations Associate (Oracle); Scrum Fundamentals (SCRUMstudy); Advanced Quality Assurance (AP, UTN).

Languages: English C1; Portuguese C1; Spanish (native).
